Wed. 7th of April, 2010

Dear Board Members,

I was horrified after hearing about the new legislation you're trying to get through. In particular the part relating to treating children. I have seen first hand the many benefits that removing a subluxation can have, especially when treating a child. Restricting the entire profession to try and police a few bad Chiropractors is completely ridiculus. It is the intelligent, hard working Chiropractors that loose out, not the rest. If you have some studies, proof that children don't benefit from regular check- ups, I would love to see it. This is an area I have personally studied quite extensively and have yet to find any.

Don't put this legislation through. It will hurt our profession, not make better.

Sincerely,

Dr. Kathy Willauer
