To the National Chiroprators Board

I am very concerned about these guidelines being put forward to the Chiropractic profession in Australia.

1/ who elected this board? i didn't and now they're representing me and telling me how to run my practice.

before these guidelines are put forward, there should be a survey done, by Practicing Chiropractors on the different aspects of Chiropractic Practice in Australia that should form the guide lines.

there are so many guidelines being put forward on so many different levels of practice, that will simply NOT ALOW ME TO DO WHAT I DO AS A CHIROPRACTOR!

more time is needed to gather the opinions of the PROFFESSION itself on these guidelines, not only 6-8 board members.

my mother recently passed away last month by suicide. she was treated for her depression with a cocktail of Medications which made the problems she had worse. this board wants to talk about SCIENTIFIC EVIDENCE! our profession is not killing people like others are.

we are a profession promoting HEALTH, and we should use whatever means we have to do so in a professional manner, NOT restrict us. what will i tell the children in my practice who have healed from ASTHMA, EXCEMA, EAR INFECTION, BOWEL DISTORDERS and many other conditions whilst under my care BEYOND 3 MONTHS, i can't treat them no longer?

the Guidelines need more time to be reviewed by the Profession in Australia
