Suprised and upset

Nick@Chirosports.com.au to natboards@dhs.vic.gov.au 09/04/2010 09:42

Dear board,

I own and run 3 out of 9 multi disiplinary clinic in the group called ChiroSports. From the submission I do understand what you are trying to do and what type of chiropractic practice you are trying stop. I agree with you on that some styles of chiropractic are hurting our profession but some parts of the proposal are very limited and will affect some parts of the community finding out about the incredible work we do. We have no less then 12 local gps and specialists as clients at the offices I work at and have and although our clinics are now word of mouth driven some of the rules in the submission would greatly affect a new clinic growing to where we are at. The advertising and Xray sections annoy me the most. if have plenty of ideas to help on the redoing of these guidelines of you want my help. I have a low cost low pressure low schedule low sales no scare tactics no short adjustment time group of clinics that are highly profitable ethical and respected on the community. I can help it work

Nick wood
Director ChiroSports
