Chiropractors submission

Peter Walters to natboards

Cc: chi[illegible]

To whom it may concern,
I am abhorred at the lack of time given to professional Chiropractors and their representative bodies to respond to the proposals put forward.
There appears to be individuals with driven personal agendas who have no idea of the situation and obligations of Chiropractors to their patients well being. The responsibilities which we recognise and respect and adhere to seem not to be acknowledged.
I agree with the document attached.

This proposal being put forward needs some radicle changing.

Why are the few offenders causing these proposed restrictions on the majority of the profession who are representing Chiropractic so well.

A lot of the changes are unnecessary.

National Guidelines GCS submission6.4.10.pdf

Sincerely

Peter Walters
