Code of practice guidelines !!! NOT FOR PUBLICATION

Mr Jeff Richards to chair 06/04/2010 04:39 PM

[illegible]

2.11.4 Any program of care should include:
• a working diagnosis / clinical impression;
• a chiropractic care/management plan;
• expected measurable outcomes of care; and
• an estimated time-frame for achieving the
outcomes.
• plan for review , reassessment

Why should a small business include such onerous excessive and completely useless systems. These before mentioned issues are at the very least ridiculous and laughable.
Some one would only guess that who ever structured this clause must think Chiropractors to be god," • an estimated time-frame for achieving the
outcomes.". clearly a crystal ball would be helpful
Jeff Richards
